

In a crisis

If a catastrophe should occur in the municipal area of the state capital of Schwerin, your life or your property may be in danger. In order to keep the risk to the population as low as possible, the state capital of Schwerin operates a network of warning sirens and, if necessary, emergency meeting points where you can find more information, medical (first) aid and a place to get warm and make an emergency call.

So-called "Leuchttürme" (lighthouses) can also be set up. Here, you can make an emergency call in the case that the 112 number is down.

This flyer provides you with helpful information on how to act when the sirens sound, and contains the locations of the emergency meeting points and Leuchttürme. It also contains information about further sources of information. Pin this flyer in a well accessible location in case of emergency.

Only seek out the emergency meeting points when you are informed that these are open via radio or loudspeaker announcements!

How to act if the siren sounds

If there is a direct danger to the population, the sirens sound to provide a warning. If a siren warning sounds, you should observe these fundamental rules of conduct:

- Look for closed rooms, close windows and doors and switch off the air-conditioning and ventilation systems.
- Switch on your local radio broadcaster or find information online:
 - warnung.bund.de
 - WarnApp NINA
 - NDR 1 MV (UKW 92.8 MHz)
 - NDR 2 (UKW 98.5 MHz)
- Follow the instructions of the loudspeaker announcements and the emergency personnel.

The siren signals

	Population warning 1 min wailing sound
	All-clear signal 1 min constant sound
	Fire alarm 3×15-second constant sound
	Siren test 15-second constant sound

Further information

You can find more information about how to act during catastrophes as well as an overview of the emergency meeting points and Leuchttürme on the following pages:
